November 11, 2019

Dear Slicer Parents/Guardians,

The administration is aware of weekend social media activity surrounding a student disciplinary incident that occurred last week. It is not the policy of the school to discuss specific student discipline due to confidentiality. While social media may continue to post about the incident at LaPorte High School, I want the public to know the matter was addressed immediately and an investigation continues in accordance with school policies and student handbook. Getting all the facts associated with the concern is important. The school is working with the students and parents involved in the incident. The matter has been reported to the School Resource Officer, too.

LaPorte High School conducts its anti-harassment program for students each school year during Slicer Resource Time. The training addresses all forms of harassment, reporting procedures, and resources for help and support.

Students are expected to refrain from all forms of disruptive behavior that interferes with the educational environment. Please know that discipline actions will be taken in accordance with school district policy and rules which prohibits harassment, fighting, disruptive conduct, and unacceptable use of cell phones/personal communication devices.

LaPorte High School is committed to an orderly and effective educational environment that promotes the best interests of its students.

Sincerely,

Ben Tonagel
