February 1, 2019

To our LPCSC staff and families,

Starting April 8, 2019 the LaPorte Community School Corporation's Foodservice Department will be implementing Titan School Solutions. Titan will be our software for customer service and most importantly online parent payments and online free and reduced applications. February 28, 2019 will be the last day we will accept online free and reduced applications and online meal payments through NutriCloud and MySchoolBucks.

We will open these features with Titan in April over spring break. Titan will offer families one site to log-in and manage their student food service accounts. Flyers will be provided to families with information on how to access the website. Updated information will also be available on the food service website.

All student and staff account balances will be transferred from our current system to Titan. There should be no problems with students using their customer accounts on April 8, 2019. During our transition we ask that families send money to their student's school in a sealed and marked envelope. Each envelope should have the child's name, teacher's name and the monetary value. At each building we accept cash or check for meal payments. One check can be split between household members in the same school.

Any household wishing to apply for free or reduced meals must complete a school year 2018-2019 paper application. Completed applications can be returned to any LPCSC cafeteria, any school building office or the food service department located at 205 Rumely Street LaPorte, IN 46350. Only physical copies completed in blue or black ink will be accepted. Electronic or incomplete submissions are deemed unacceptable by the state.

If you have any questions regarding this change please contact the food service department at 219-362-8823.
